FOH mix GENERAL NOTES:

1. Pump plays the music of Aerosmith so the mix should be balanced between bass, midrange and treble frequencies with an emphasis to the bass & kick in the house mix.
2. Backing vocals should be mixed in unify to create a gang vocal block sound.
3. Vocal effects are: a medium room reverb or medium plate for spaciousness.
4. Drum toms & kick get "drum plate" or small room reverb. Snare should have a gated verb.

MONITOR Mix GENERAL NOTES for VOCALS:

1. Monitor mix #1 need guitars, bass, kick & snare with main focus on vocals.
2. Monitor mix #2 needs all vocals with some guitars & bass.
3. Drum monitor mix should have an even balance of guitars, bass & vocals.
4. Monitor mixes should have a touch of medium plate reverb on the vocals only.
